About Me

I have two years’ experience in the IT market and one years’ experience as an economic analyst, also working with data science. I was also a research assistant in the scientific initiation programme at UFABC, and I am currently enrolled in the 11th period of the Science and Humanities programme and the 8th period of the Economics BA degree’s programme. Furthermore, I currently work as a DevOps Engineer at NTT DATA. My interests are time series econometrics, machine learning, Linux systems, automations with ansible and programming in R and Python.

Skills

- 🐍 Python:
 - 📊 Pandas: Advanced
 - 🐼 Scikit-learn: Advanced
 - ⚡ FastAPI: Intermediate
 - 📀 Keras: Intermediate
 - ⬆ TensorFlow: Intermediate
- 🗄 Databases:
 - 🐘 MySQL: Intermediate
 - 🗄 PostgreSQL: Intermediate
 - 📌 MongoDB: Beginner
- 📦 Azure:
 - ☁ Azure DevOps: Intermediate
 - 🌌 CosmosDB: Beginner
- 📖 Ansible - Intermediate
- 🌟 Apache Spark - Intermediate
- 🐳 Docker - Intermediate
- 🏠 GitHub Actions - Intermediate
- 🔁 Go - Intermediate
- 🏹 Terraform - Intermediate
- 📶 AWS - Beginner
- 🌪 Apache Airflow - Beginner
- 🔗 ArgoCD - Beginner
- ⚙ Grafana - Beginner
- ⚙ Kubernetes - Beginner
- 📊 Prometheus - Beginner

Education

Federal University of ABC

BA degree in Economics

- 📍 São Bernardo do Campo, SP
- 📅 2018 - 2023

BA degree in Sciences and Humanities

- 📍 São Bernardo do Campo, SP
- 📅 2018 - 2022

Fatec São Caetano do Sul

Information Security

- 📍 São Caetano do Sul, SP
- 📅 2015 - 2017

Work Expericence

DevOps / Site Reliability Engineer

- 📍 NTT Data
- 📍 São Paulo, SP
- 📅 2022 - Now

I manage CI/CD pipelines with Azure DevOps and monitor the performance of microservices with ArgoCD and New Relic. I am also responsible for building automation tools using Infrastructure as Code (Terraform, Ansible and Helm), Python and Go.

Economic analyst

- 📍 Abramge
- 📍 São Paulo, SP
- 📅 2022 - 2022

My main activity was related to data extraction about the private healthcare sector in Brazil. To do this, I created ETL pipelines using R to process a broad amount of data, used exploratory data analysis to produce reports and dashboards for public use. I also managed databases using PostgreeSQL and serverless databases such as SQLite and Apache Arrow. I was also responsible for forecasting relevant variables using time series econometric tools (mainly VAR-related models).

Economics internship

- 📍 Abramge
- 📍 São Paulo, SP
- 📅 2021 - 2022

My internship was related to data extraction about the private healthcare sector in Brazil. To do this, I created ETL pipelines using R to process a broad amount of data, used exploratory data analysis to produce reports and dashboards for public use. I also managed databases using PostgreeSQL and serverless databases such as SQLite and Apache Arrow.

Research

Scientific Initiation Program (PIC-UFABC)

- 📍 CECS - UFABC
- 📍 São Bernardo do Campo, SP
- 📅 2020-2021

I researched exports from the Midwest region of Brazil, as well as the commodity cycle of the 2000s and its relationship to the region’s agro-industrial complex. I used data from Comex Stats and carried out analyses using tools such as R and Google BigQuery. My research relied on exploratory data analysis and visualisation to draw conclusions about the period analysed.
